What is Youth-Friendly Services Virtual Tour?

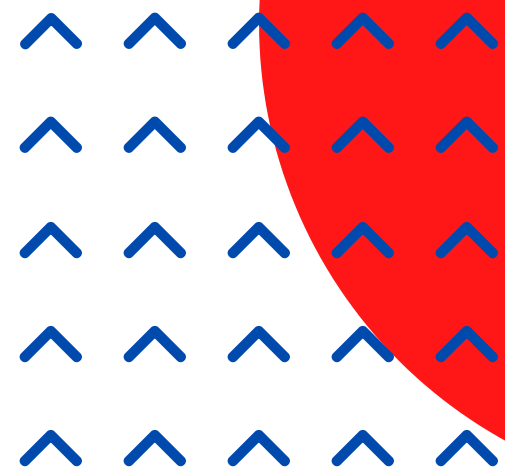

Simulation of an existing location -- in this case is Local Community Health Center in Lampung, Indonesia, by the health workers introduce the youth-friendly services' work and its facilities utilizing Zoom application to 80 students.

The steps...

1

Choose a Local Community Health Center and its health-worker that have been capacitated in providing youth-friendly services, as well as experience value clarification regularly.

2

Ask the chosen health-worker to collaborate through gather some photos that can illustrate the SRHR services in the Center

3

Invite and assist the health-worker in the Zoom meeting to explain regarding SRHR services that are covered by the Center

Explain sexual and reproductive health services that are youth-friendly and can be accessed in the Center

The Center have a Youth-Friendly Services, where all the youngsters who visit the Center, will be referred to the services

Introduce the:

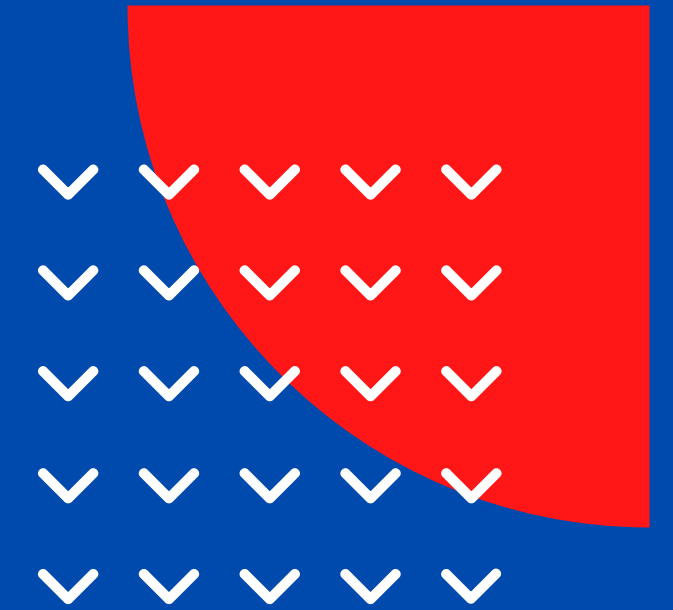

- Location
- Facilities (through photos)
- Administrative procedures

How did we do it?

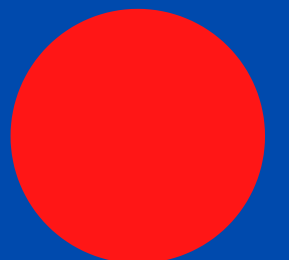

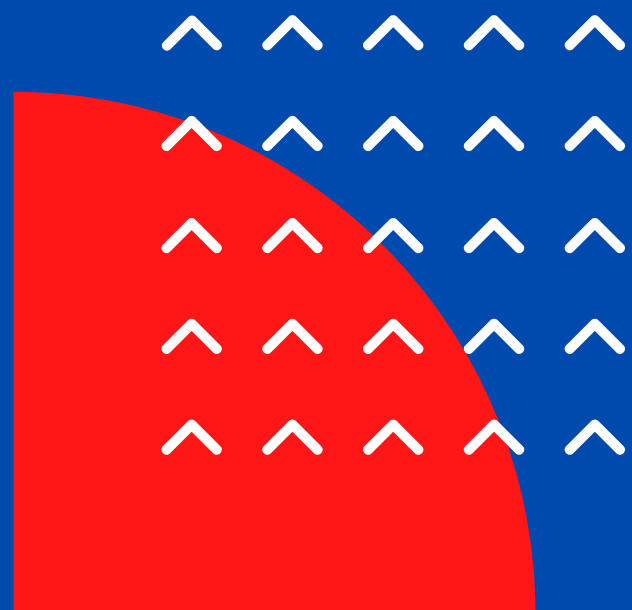

BUT...

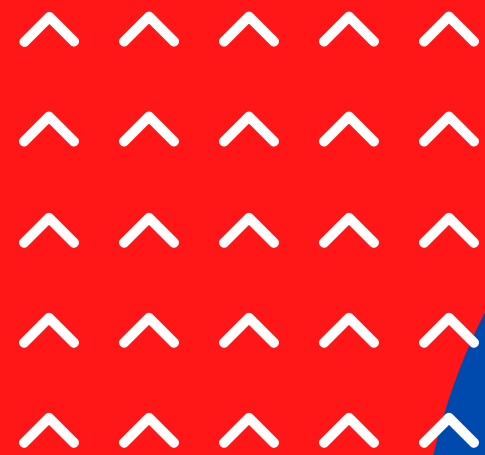

Ideally...

The tour can be conducted through the vlog or live virtual tour method. However, since the health-workers need assistance to use camera and video, also the Center was not conducive to held such event -- thus, we invited them to the office

From the experience, we learn...

The students were very cooperative and enthusiast. Many of them did not know such services exist in an affordable cost, thus they mentioned numerous follow up questions to the health-workers after the session

Facilitators (Champion4Life) need to assist the process, in case there are some unclear issues / values of the health-worked in the session
